PROFILE

Full-stack, mobile, and Web3-focused Computer Science undergraduate building apps across Flutter, React.js, Next.js, Node.js, and Ethereum smart contracts. Smart India Hackathon 2025 institute finalist and Software Development Intern on an AI-based speech and language learning system.

EDUCATION

B.Tech in Computer Science and Engineering, Vellore Institute of Technology, Chennai Expected 2027
CGPA: **8.63/10** Class XII (2023): **94.4%** Class X (2021): **97%**

TECHNICAL SKILLS

Languages:	Python, Java, C, C++, JavaScript, TypeScript, Dart
Web & Mobile:	React.js, Next.js, Node.js, Tailwind CSS, HTML, CSS, Flutter
Blockchain & AI:	Ethereum, Solidity, Web3 (wagmi, viem), AI/ML
Databases & Tools:	Supabase, PostgreSQL, MongoDB, Git, GitHub, Vitest, VS Code

EXPERIENCE

Software Development Intern, Impower Centre May 2026 – Jul 2026
Verbal Coach | Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Vitest

- Co-developed, in a **5-member team**, a speech-therapy platform where clinicians author activities on a canvas, assign them to patients, and track progress, serving **3 roles** (clinician, patient, parent) across **42 routes**.
- Delivered a drag-and-drop **Template Studio** with undo/redo and multi-page printable worksheets, a patient activity player with server-side scoring, real-time messaging across all roles, and **AI-generated clinical insights**.
- Enforced access control with **row-level security** on every database table; shipped ∼**23.8K lines** of TypeScript backed by **71 unit tests** across 9 suites, completing all planned work in an 8-week internship.

PROJECTS

Tour Secure AI – Tourist Safety Platform | Flutter, Dart, Supabase, Solidity, AI/ML GitHub

- **Sole developer of the Flutter mobile app** in a team project; teammates built the web version.
- Integrated **Ethereum smart contracts (Solidity)** for tamper-resistant tourist digital identity and records.
- Built the **Supabase** backend and mobile workflows for digital ID, real-time safety alerts, and emergency SOS.

Fortify DeFi – Risk-Aware DeFi Platform | Next.js, TypeScript, Tailwind CSS, wagmi, viem GitHub

- Built a DeFi platform covering **risk-aware portfolio management, yield vaults, insurance workflows, and DAO governance**.
- Designed responsive dashboards with interactive risk and portfolio analytics visualizations.
- Integrated wallet and on-chain interactions using **wagmi** and **viem** within a component-based architecture.

Decentralized V2X Ecosystem | TypeScript, React, FastAPI, scikit-learn, WebSockets GitHub

- Built a decentralized vehicle-to-everything system with peer-to-peer hazard sharing over **6 ETSI C-ITS message types**, roadside-unit edge inference, a city digital twin, and IEEE 1609.2 certificates with pseudonym rotation.
- Against a centralized baseline over **5 seeds** with 95% CIs: cut cloud uplink traffic by **88.7%**, kept **100% availability** through a cloud outage (vs. 0%), and raised hazard-detection precision from **0.861 to 0.994**.
- Trained a regional congestion model with **federated averaging** (**24 rounds**, **275.6 KB** of raw telemetry kept local) and shipped a **7-scenario** guided demo backed by **360+ automated tests** (pytest + Vitest).

E-Commerce Platform | React.js, Node.js, MongoDB *1st Place, Inter-College Web Dev 2024*

- Built a full-stack store with product listings, cart, order tracking, and an admin dashboard.

ACHIEVEMENTS & LEADERSHIP

- **Institute Finalist, Smart India Hackathon 2025:** Built the Tour Secure AI mobile app for tourist safety.
- **First Place, Inter-College Web Development Competition 2024:** Built a full-stack MERN e-commerce store.
- **Event Manager, College Club:** Planned and ran college-level events with cross-functional teams.

LANGUAGES

- **Spoken:** English, Tamil, Hindi
